**MODULE AIM(S)**

This module aims to equip mental health practitioners with the knowledge, skills and attitudes to apply recovery principles and values in practice.

**MODULE LEARNING OUTCOMES**

By engaging successfully with this module a student will be able to
- Critically evaluate the historical development of attitudes towards mental health and their implications for recovery practice.
- Critically analyse models of mental health and synthesise that analysis into implications for practice.
- Apply and share concepts of recovery with a service user promoting empowerment, choice and self determination.

**INDICATIVE CONTENT**

- History of mental health, origins of psychiatry, models of mental health.
- Core principles and values of the Recovery model.
- Client complexity, the value of diagnosis, treatment modalities medication.
- Lay models of psychosis, experts by experience, risk.
- Use of self, value based practice.

**LEARNING AND TEACHING METHODS**

Students will be supported in their learning to achieve the above outcomes, in the following ways

- Students will be supported throughout by expert practitioners and clinical educators.
- Interactive teaching/learning methods will capitalise on the diversity within the group and the learners’ previous and ongoing clinical learning experiences throughout the module/course. A range of group and individual teaching/learning methods will be employed including:
  - Summary of the topic, its place in the overall programme and an outline of the next part of the course.
  - Summary of the course to date (emphasising core themes).
  - Case presentations, providing a clinical up-date to the whole or part of the group.
  - Overview of the subject matter with coverage of participants' current practice and/or experience emphasising information sharing and vicarious learning.
  - Discussion and feedback (emphasising strengths and change opportunities).
• Trouble-shooting sessions at the end of each taught part of the programme to predict potential areas of difficulty.
• Blended learning utilising a Virtual Learning Environment and electronic sharing of resources and ideas.

ASSESSMENT CRITERIA

Written Piece and Supervision Log

Written Piece

In the written case study (3000 words) (100% pass) the following should be included:

• An analysis of the historical and current factors (including models of mental health and the principles and values) which influence recovery.
• How these apply to a selected client. Students should critically evaluate the literature to demonstrate a clear rationale for their work.
• Critical reflection of principle skills and values utilised.
• Outcomes to date and implications for future work with the individual.

The student should refer to research and the literature, which supports all these elements.

The supervision log: (20% pass/fail)

• Submit a supervision log detailing the amount, content and process of clinical supervision received with regard to the evolution and application of recovery approaches. This will provide evidence of receipt of 2 hourly sessions of specific practice supervision relating to an individual.
• The first session of supervision will take place at the start of the module and result in an intervention plan for the individual. This plan will feed forward to the second session which will take place mid way through the module.
• The supervision log must provide evidence of how you have applied the learning outcomes for this module to an identified individual/family.
• A supervision template for this module will be made available when it commences.

To gain a pass, students must achieve a minimum overall grade of 50%.

FEEDBACK

Students will receive feedback on their performance in the following ways

• Students will be offered individual tutorials throughout the academic year to receive individual feedback on their progress
• Students will be required to attend individual clinical supervision as provided by PSI unit where feedback on clinical and academic performance will be provided
Students will be offered guidance in selecting suitable topics or material, where needed.
Summative feedback will be given in written form after work has been assessed and marked, usually within four weeks of submission.

LEARNING RESOURCES (INCLUDING READING LISTS)
Available on-line, via SHU Library or (journal articles) from PSI Unit.

Department of Health (2011), No Health Without Mental Health, HMSO London

</tbody>
</table>

 Is timetabled contact time required for this module? Y

 Are any staff teaching on this module non-SHU employees? Y

 Sheffield Health and Social Care NHS Trust

 What proportion of the module is taught by these non-SHU staff, expressed as a percentage? 100%

 MODULE ASSESSMENT INFORMATION

 Does the Module (using Model A Assessment Pattern) Require Either*

<table>
<thead>
<tr>
<th>Overall Percentage Mark of 50%</th>
<th>Overall Pass / Fail Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y</td>
<td>N</td>
</tr>
</tbody>
</table>

*NB: Choose one of the above – Model A module cannot include both percentage mark and pass/fail graded tasks

 FINAL TASK

 According to the Assessment Strategy shown in the Module Descriptor, which task will be the LAST TASK to be taken or handed-in? (Give task number as shown in the Assessment Strategy) Task No. 1

 MODULE REFERRAL STRATEGY

 Task for Task (as shown for initial assessment strategy) Y

 Single Referral Package for All Referred Students N

 *if YES complete table below
